Interview with BBC, Norfolk, September 2010 about the road through the Serengeti.

TV Interview with Fox news after giving Congressional testimony on the Endangered Species Act.

Chief scientific consultant for two PBS series which will premiere in 2003 and 2004: “Outbreak” dealing with infectious diseases and human welfare; and the second series dealing with the State of the Natural World in the Third Millennium.

Scientific Advisory Board to the Sea Studios Environmental series ‘Strange Days on Planet Earth’.

Numerous radio and newspaper interviews following publication of “Disease and Climate Change” article in *Science*. 2002.

I worked as a scientific consultant and script editor to Bailey Silleck ’62 on the IMAX film “Lost Worlds: Life in the Balance.” The film describes the current biodiversity crisis. The movie is partly based on my book “Conservation and Biodiversity,” it is narrated by Harrison Ford and Margarita Lampo. The film premiered in various cities though out the U.S. in 2002, nominated for an award at Wildscreen 2002. Bailey Silleck and I are working on drafts for an IMAX film on the life of Alfred Russell Wallace and also an IMAX film on the Serengeti.

Chief scientific consultant for MW Productions for a four-part TV series on “Voyages of Natural Discovery 1700-2000.”

I have appeared at least once a year on NPR’s “Living World” and “Science Friday” to discuss the work on infectious disease ecology and on the geographic distribution of endangered species.
